

## Tired of Your Suction Equipment “Walking” Away?

## Avoid the Frustration of Paying Replacement Costs for Lost Capital Equipment

The Suction Regulator Safety Tether protects your hospital's investment by allowing you to:

- Secure your suction equipment directly to the wall
- Remove the suction regulator from the vacuum source without removing it from the room

The Boehringer Suction Regulator Safety Tether is constructed of durable vinyl coated stainless steel and can be factory installed with the purchase of new suction regulators. On-site installation is easily achieved with conventional tools.
